

Would MikroLeo be able to fill the screen of a 640x480 VGA monitor with a single color?

Flowchart for generating a 640x480 VGA image at 60Hz

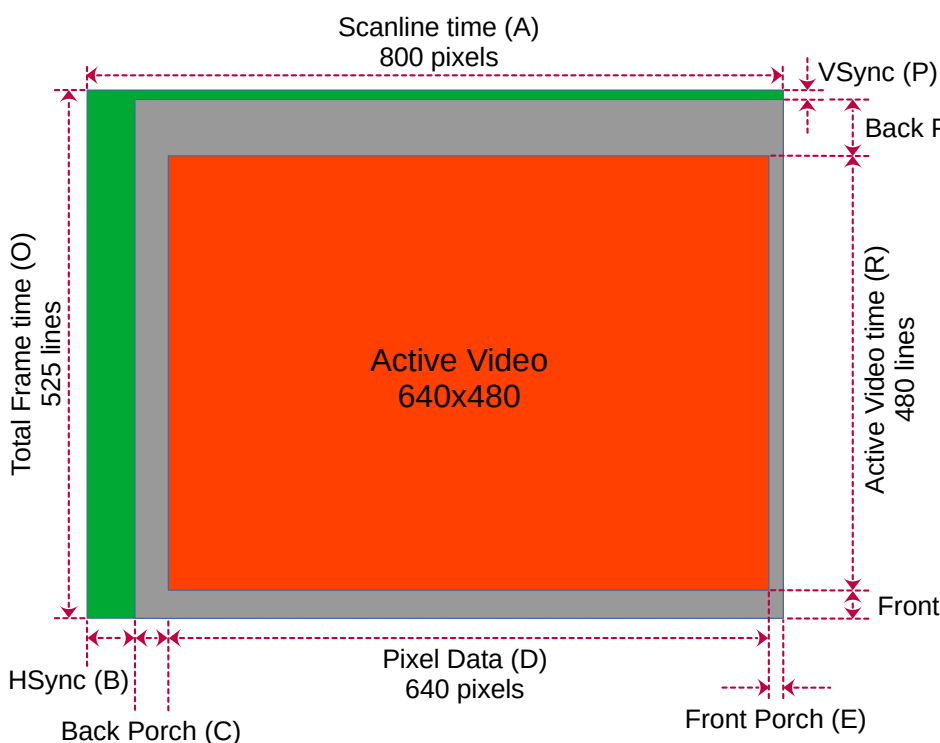

640x460 @ 60Hz specs:

Pixel Clock: 25.175 MHz

Horizontal pixels (A): 800 => Horizontal frequency: $25.175\text{M} / 800 = 31.468\text{ kHz}$

Vertical pixels (O): 525 => Vertical frequency: $25.175\text{M} / (800 \times 525) = 59.94\text{ Hz}$

Horizontal	Pixels	Time (s)
Front Porch E:	16	635.55E-09
HSync B:	96	3.8133E-06
Back Porch C:	48	1.9066E-06
Visible D:	640	25.4220E-06
Total A:	800	31.78E-06

Vertical	Lines	Times (s)
Front Porch S:	10	317.775E-06
VSync P:	2	63.5551E-06
Back Porch Q:	33	1.0487E-03
Visible R:	480	15.2532E-03
Total O:	525	16.6832E-03
